Tokyo Ohka Kogyo Co., Ltd.

Notice Regarding the Establishment of a New R&D Building
—Enhance Development to Create New Businesses—

We, Tokyo Ohka Kogyo Co., Ltd. (TOK) has decided to establish a new R&D Building and its related facilities in Sagami Operation Center, the Group's main development base, in order to focus on development of new technologies leading to our new businesses in the future including next-generation semiconductors, IoT, next-generation batteries, new energies, wearable devices, and life science-related technologies, and to create new values. The total investments for the new building and facilities are expected to exceed 5 billion yen, with the construction to begin in December 2017 and to be completed in September 2019.

Concept of the new R&D Building

- Accelerate open innovation
- Enhance environment to reform business portfolios
- R&D of manufacturing technologies to further improve product quality
