

# Technologies for Sustainable Development

## TOK's photoresists contribute to the sustainable development of society

Innovative semiconductor and other technologies play a major role in finding solutions to the global risks and social issues that have emerged one after another, such as rapid and far-reaching climate change and new infectious diseases. TOK is enhancing its economic and social value by continuously developing and providing high value-added materials for semiconductors to help solve the social and scientific issues in each era.

TOK's photoresists and high-purity chemicals

Semiconductors

### Economic value

Contributing to the evolution of all types of industry and technological innovation
